Summary

I am a Data Science graduate from Cairo University with hands-on experience from some internships and training programs in data science and AI. I've worked on practical projects that combine data and technology to solve real problems.

Education

B.Sc. in Data Science, *Faculty of Computer Science and Artificial Intelligence, Cairo University* Sep 2022 – Jul 2026
GPA: 3.67 / 4.0

Experience

Data Science and AI Internship, *Fixed Solutions* Jul 2025 – Oct 2025

- Phase 1 – Full-Stack Data Science: built full-stack applications including a multi-organizational chatbot and AI agents using n8n.
- Phase 2 – Advanced Data Science and Analytics: analyzed complex datasets for segmentation, behavior prediction, and optimization, including customer analytics and fault detection in robotic systems.
- Phase 3 – Agentic AI: contributed to an agent-based RAG chatbot integrating structured, unstructured, and graph data for more intelligent, validated responses.

NLP Summer Training, *National Telecommunication Institute* Jul 2025 – Aug 2025

- Learned NLP fundamentals through hands-on projects in text processing, embeddings, and sentiment analysis.
- Joined sessions linking technical learning with freelancing and professional development skills.

Big Data (ETA) Summer Training, *National Telecommunication Institute* Aug 2024 – Sep 2024

- Completed training in the Hadoop ecosystem as part of the Egyptian Talents Academy program.
- Gained practical experience with HDFS, Spark, Hive, Flink, Kafka, and Elasticsearch, and how they integrate to manage and analyze large-scale data.

AWS Cloud Summer Training, *National Telecommunication Institute* Aug 2024 – Sep 2024

- Learned cloud computing, virtualization, and software-defined storage fundamentals through VMware-based sessions.
- Completed AWS Cloud Practitioner and Cloud Architecture courses, covering deployment and management of cloud-based systems.

CIB Summer Internship Jul 2024 – Aug 2024

- Explored data literacy, cybersecurity, and financial inclusion through sessions led by industry experts.
- Studied how data digitalization and fintech innovation are reshaping banking and financial accessibility.

Projects

Lumin — AI-Powered Vision Assistant for the Visually Impaired, *Graduation Project*

- Built an assistant for visually impaired users combining object detection, OCR, and web search, with a Flutter front end and FastAPI backend.
- Designed the system architecture end-to-end, from mobile UI to backend inference services.

VEGA, *NASA Space Apps – Cairo local winner, nominated globally*

- Created an interactive educational website about exoplanets, featuring data-driven habitability predictions and tools such as stories, quizzes, and simulations.
- Combined design, data visualization, and machine learning to make space science accessible to a general audience.

Multi-Organization RAG Chatbot Platform

- Built a domain-specific AI assistant delivering accurate, context-aware answers while keeping each organization's data private.
- Supported multi-format document uploads, multilingual retrieval, voice interaction, and feedback monitoring.

Technical Skills

Programming: Python, C++, C#, Java, SQL

Frameworks & Tools: Flutter, FastAPI, LangChain, PySpark, Kafka, Spark, n8n

Concepts: Machine Learning, Deep Learning, Agentic AI, Computer Vision, NLP, Data Structures, Algorithms, Big Data, AWS Cloud, Problem Solving

Courses

- ALX Data Science Program Internship (May 2025)
- DataCamp Associate Data Scientist in Python Track (May 2025)
- Machine Learning Specialization, Stanford University and DeepLearning.AI (Coursera) (February 2024)
- Michigan University Python for Everybody Specialization (January 2024)
- Business Model Innovation Course, Egypt Innovate (December 2023)
- Artificial Intelligence (HCIA) Summer Training, Huawei — National Telecommunication Institute (Jul 2023 – Aug 2023): 120 hours covering mathematics and statistics for AI, and machine learning and deep learning algorithms

Activities

- Mathematics Assistant (Team Leader), 2022–2023
- Member, Machine Learning Community — Google Developer Student Club, 2023–2024
